2) Short Description

Chevron style KP rollers including bearings and pulley for Claas® series 492

Replaces OEM#: 00 0067 864 0, 00 0238 280 3

Kernel Processors or Corn Cracker modules consist of two mill rolls with teeth pressed together by powerful springs, and are frequently used when harvesting cereal crops like corn and sorghum to crack the kernels of these plant heads. Kernel processors or Corn Crackers are installed between the cutterhead and accelerator. In most forage harvesters, the Kernel Processors or Corn Cracker can be quickly removed and replaced with a grass chute for chopping non-cereal crops. The length of the chopped forage is important, and corn kernels and stalk sections need to be cracked open otherwise they pass through the animal undigested.

Compatible models:

Claas® 492 Series:
Claas® Jaguar 830, Claas® Jaguar 850, Claas® Jaguar 870, Claas® Jaguar 890, Claas® Jaguar 900.

4) A&M PREMIUM Warranty

All our equipment is inspected with the Harvester-Guard (R) inspection software. This certificate declares that this forage harvester has A&M PREMIUM warranty on:

1. All inspected CROP-FLOW components with a 3, 4 or 5 star rating.
2. All CROP-FLOW bearings which have status approved.

Warranty on repairs:

Components with 1 or 2 star rating are subject for repair and have no warranty. In case A&M Machinery is ordered to repair the 1 and 2 stars components then warranty is in place, as repair implies upgrade to 5 stars or status approved.

Eventually repairs are reported in the "A&M PREMIUM or A&M EXCLUSIVE warranty certificate & terms" document.
