Technical specifications

Partnumber 22174

Options

2) Short Description

Looking for a more powerful solution for efficient maize distribution? Then choose the Holaras Knife 570-H-135, equipped with a hydraulically operated maize leveling scraper with a larger working width and height. This makes the distribution of supplied maize even faster and more efficient, without waiting times for silage wagons and tippers. The Holaras Knife 570-H-135 is designed to meet the highest demands in terms of quality and durability. The blade is made of high-quality material and can be easily operated using the hydraulic control. This makes it possible to quickly and accurately distribute the maize over a larger working width and height than the 430-H-115 variant.
