Technical specifications

Partnumber	23044	Brand	Marangon
Model	MDR6014		

Options

2) Short Description

For Sale NEW Marangon 6014 Direct Cut Header for self propelled forage harvesters. Former manufacturer of the New Holland direct cut headers. Cutting width of 6 meters. Complete with primary cardan shaft, Z12 auger variation speed sprocket, PTO speed sensor, transport trailer optional available. Oscillating central attachment with suspension or fix adaptable to all forage harvesters models. The innovative cutter bar is made of an advanced wheelbase gears system and allows an indirect transmission to the gears reducing the traction power and assures a minimum wear. The big gears transmit independently the motion to the small gears of the disks ensuring a uniform and efficient distribution of the power on each disk. The cutter bar is totally welded to provide greater stability. The auger has a large diameter, to allow an uniform and constant conveying of the product for the whole length.
